Nic. Have a look at what David has come up with for map books for the Helo Operations.

All water facilities shown. Green = Within flood surge, Orange =Not within flood surge, Red box = potential Overview map area; Arrows = possible path.

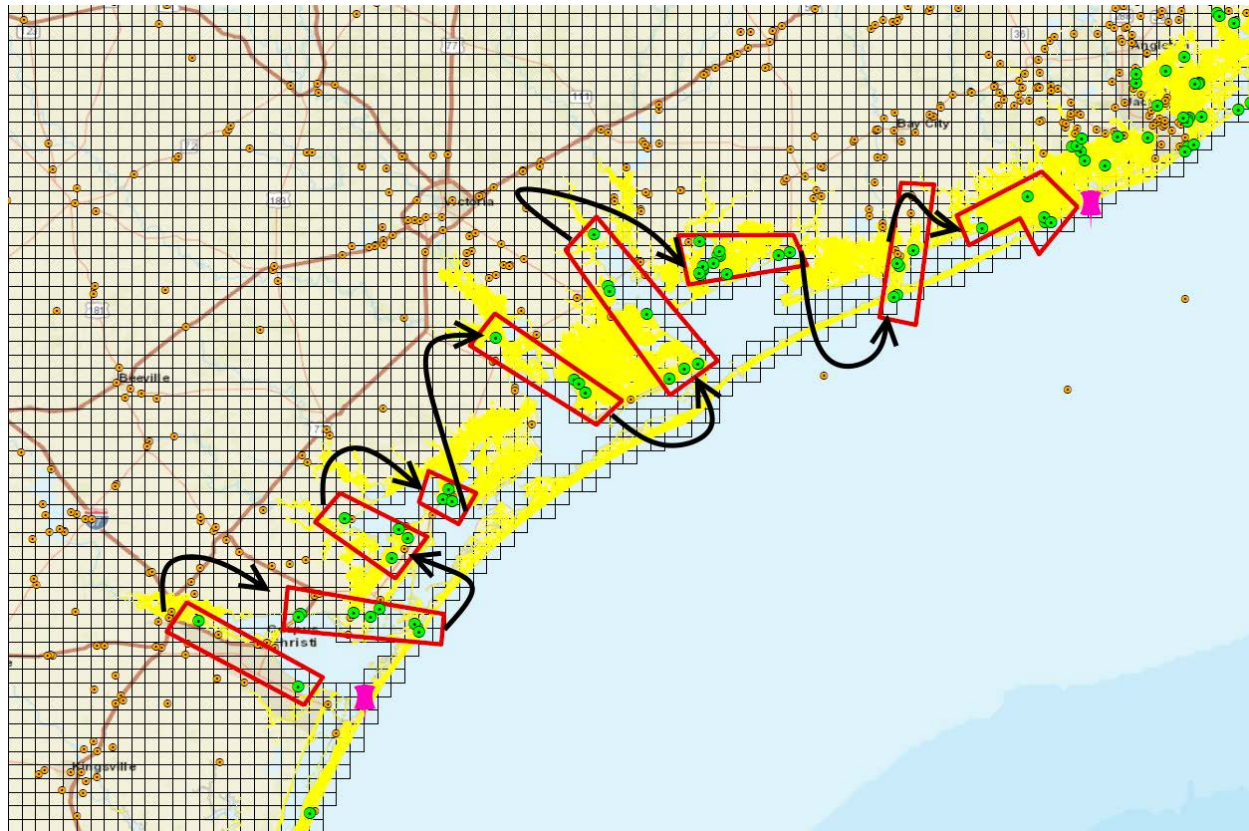

The start point is basically West Corpus/South Port Aransas near the Crane Islands, and the end point is Bay City. David also a path mileage estimation with the measure tool... we're looking at ~262 miles.

Do you want a continuous map book or a parsed out one with the areas in red.

Thanks, Janine
